EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jun Lee on July 2, 2004.

The application has been amended as follows:

In "The Abstract of the Disclosure":

Delete the current abstract and replace it with the following:

-- A real object projector having a base, a control circuit installed in the base, and an image receiving apparatus installed on the base. The base is combined with a light source module, and between the light source module and the base are different movable connection relationships according to different designs. The light source module can have a transparent film clip with an identifying mark, and different transparent film clips have different marks. When projecting with the real object projector the steps are, firstly moving the image receiving apparatus to a suitable position according to the mark on the transparent film clip, then focusing the image receiving apparatus according to the transparent film clip, and finally pressing an image receiving key to automatically identify the kind of transparent film clip and magnify the projection image with the control circuit.--

Art Unit: 2851

In the claims:

In claim 2, line 2, change "comprises a arm" to -- comprises an arm --.

In claim 11, line 2, change "controlling operation" to - - controlling operation --.

The following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggests a real object projector comprising all of the elements of claim 1, and particularly the following limitations: "wherein the light source module is movably connected to the base, and at least one transparent film is placed on the light source module and the light source module provides a light source for the image receiving apparatus to receive an image of the transparent film."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
